Intro

[103 pts] Baby Web
by dsantl
The flag is only one click away... if you can catch it! 🏃

Given an index.html file that when opened directs to a page with a button. I assumed the task was to catch the button because it instantly teleports when the cursor is approaching. Caught it and got the flag.

OSINT

[Unsolved] OSINT Exam II
by ipaljak
We regret to inform you that the OSINT certification you've received last year has expired.

You can renew your certification by passing our new OSINT exam.

Given a zip with multiple images in it and also a nc.
1) <q1.png> depicts one of our team members after finishing a race. What city was the race at, what was their bib number, and what was their finish time (hh:mm:ss)?

Format: <city> <bib_number> <chip_time> (e.g. New York 12345 11:22:33)

Here I opened q1.png

Showing a 10K Men’s medal and almost nothing else at plain sight. Though on the runner’s thighs, there is a link and a QR code (unscannable)

When going to the link, it asks for the runner's password that was used when registering for the event. Probably almost impossible so I looked up the internet for UK 10K running events (assumed UK because of the link)

A website showed that there are only 2 annual events, in Edinburgh and Glasglow. Using this website: https://www.mens10k.com/results

I provided the number and got this

Running Number

14480

Event

2026 Men's 10K Edinburgh

Show all events

Gender

Male

Category

Any

SHOW RESULTS

Position (Overall)	Position (Category)	Name Number	Club	Chip Time	Gun Time
653	243 U35M	Ivan Paljak 14480		00:53:14	00:55:12

The runner was Ivan Paljak and checking his online profile, he works for a tech company (matches “one of our team members”)

Answer: Edinburgh 14480 00:53:14

2) This year we had a booth at one of the largest European identity conferences and we had a great time as you can see in <q2.jpg>. What was the name of the talk that one of our members gave?

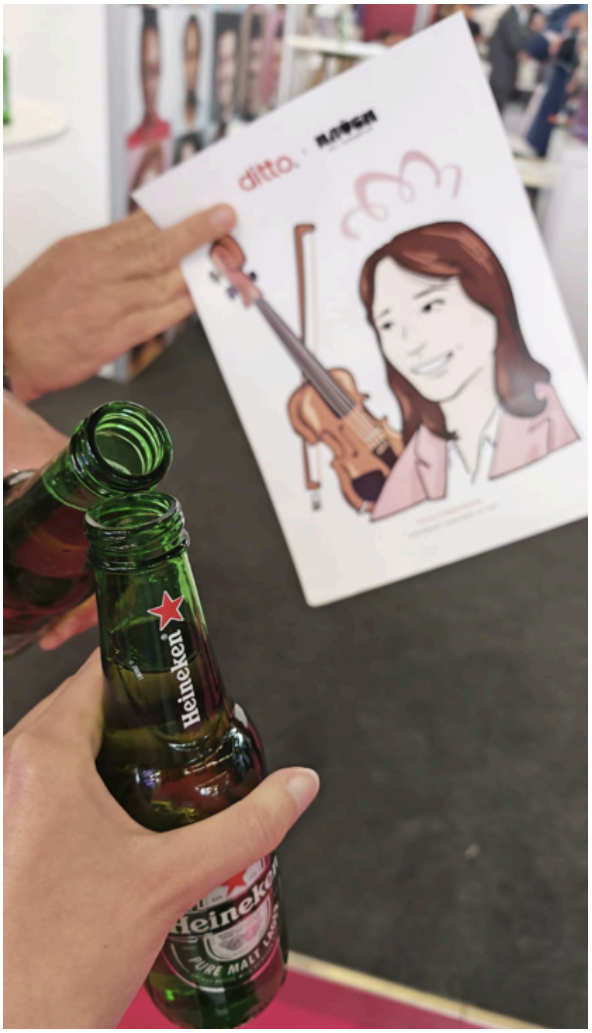

Format: <talk_title> (e.g. On the Navier-Stokes Millennium Prize Problem)

I searched European identity conferences and came across European Identity and Cloud Conference 2026 (EIC 2026). Knowing Ivan Paljak worked at Blockhouse Technology, I looked up the event speakers that worked at the same place and found Petra Krizan as a speaker

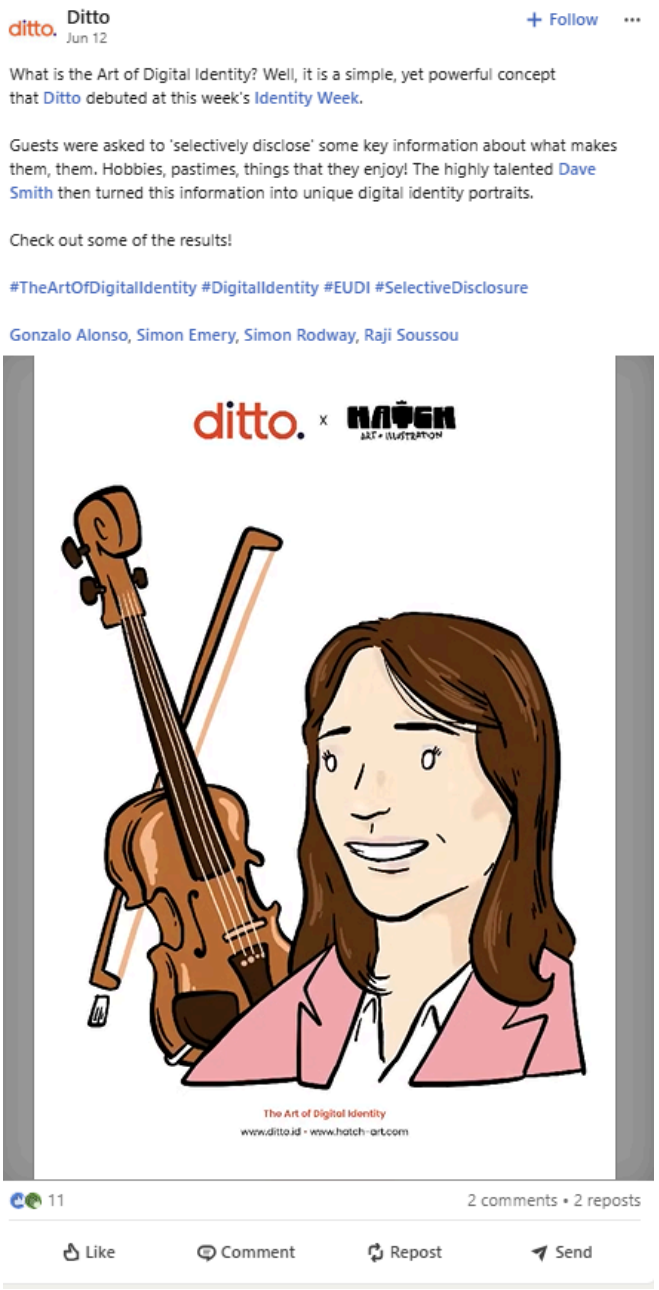

Answer: From EU Digital Identity Architecture to Real-World Services

3) When conferencing in Amsterdam, enjoying a Heineken is a must! As you can see in <q3.jpeg>, one of our team members even got a sketch of themselves. The piece (concerto) of which composer did they play during their final exam in music school? Can you also find the address of the apartments they are renting on the Croatian coastline?

Format: <composer_name> <street> <apt. no.> <postal_code> <city> <country> (e.g. Antonio Vivaldi Zinke Kunc 42 42000 Varazdin Croatia)

The only thing recognizable is the drawing and the company Ditto. I searched Ditto events that also featured the brand next to it and came across a post on LinkedIn featuring Identity Week.

The exact same image but I couldn’t find any more information about the woman in the image.
